How companies use external capital to manage costs, enhance liquidity and reduce risk

LEGAL FINANCE CASE STUDIES

Legal finance is often described as a range of products: Fees and expenses financing, portfolio financing, monetization financing and so forth. But when a GC is considering how to improve budget certainty or a CFOs needs to reduce risk, they aren't looking for a product—they're simply looking for a solution to a specific business need.

Burford has reviewed well over 10,000 requests for funding, each representing unique client needs and each offering our team of more than 65 lawyers an opportunity to provide a customized legal finance solution to optimize the financial impact of clients' commercial litigation and arbitration assets.

Below, we share recent case studies to illustrate some of the ways in which Burford has helped companies generate value from what would otherwise be illiquid assets or a drain on corporate budgets.

Thank you for your interest in Burford.
